Introduction

Society has a great interest in wind as a renewable energy resource. It is a topic of lively media debate where, among other things, different perspectives on its environmental impact, its approval process and how it relates to climate change and energy politics are presented. It is sometimes difficult to discern which opinions are facts based. Seemingly, there is a need for independent, scientific and factual information regarding wind power.

In order to get an overview of current wind power research, we have created this appendix of recently published and ongoing research in Sweden. In this country, research is being done to study the effects of wind power on society and the environment as well as to develop technology.

This appendix, which is focused on cross disciplinary and social science research, refers to academic articles, reports, dissertations, and theses written during 2011 and 2012. This data comes from different databases as well as from direct contacts with universities and researchers in Sweden. Our aim is to cover as many areas as possible, and we are happy to receive additional submissions. This appendix will be updated twice a year.

Gotland University is the hub responsible for educational and competency related questions in the National Network for Wind Power Utilization and is financed by the Swedish Energy Agency. This appendix has been compiled as part of this assignment.

The report has been compiled by Andrew Barney, Liselotte Aldén and Marita Engberg Ekman

Researching business models for service and maintenance in Africa.

Planned additional research in Sweden and Africa.

Danilovic, Mike (Halmstad University), Hoveskog, Maya (Halmstad University), Halila, Fawzi (Halmstad University), Campbell, David (Halmstad University)

Future research planned on the cumulative effects of wind power and wind power development in mountain regions and protected areas.

Additional research also planned for gauging peoples experiences with turbine parks.

Bodén, Bosse (Mittuniversitetet).

Valuing Local impacts of Wind Power Establishments: Public and Private Preferences towards Economic, Environmental and Socio-Cultural Values.

A study of how locals value characteristics associated with the planned wind farm at Markbygden in Piteå.

Ek, Kristina (Luleå universitet), Matti, Simon (Luleå universitet).

On the wake pressure-footprint and its potential application for wake flow analysis.

A study to establish the pressure plate method as a fast qualitative and quantitative experimental method for the analysis of wake interaction.

Khan, Mubashar (Högskolan i Gävle), Sandberg, Mats (Högskolan i Gävle), Fransson, Jens (Högskolan i Gävle), Wigö, Hans (Högskolan i Gävle).

Numerical Investigation of Icing Effect on the Wind Farm Energy Production.

PhD study to develop a better understanding of how icing affects wind farm production. A part of the IceWind Research Project.

Teneler, Görkem (Gotland University/KTH)

Numerical computations of wind turbine wakes and farm wake interaction - Optimization and control.

Licentiate thesis to evaluate different aerodynamic methods used for modeling wake flow using CFD.

Nilsson, Karl (Gotland University/KTH)

Large-eddy simulations of the Lillgrund wind farm.

Nilsson, Karl (Gotland University/KTH), Ivanell, Stefan (Gotland University/KTH), Hansen, Kurt (DTU), Sørensen, Jens (DTU), Breton, Simon-Philippe (Gotland University), Henningson, Dan (KTH). 2012.

Keywords: Atmospheric conditions, atmospheric turbulence, CFD, RANS, ACD, LES, ACL

Validation of the actuator line technique using near wake measurements of the MEXICO rotor.

Nilsson, Karl (Gotland University/KTH), Shen, Wen (DTU), Sørensen, Jens (DTU), Breton, Simon-Philippe (Gotland University), Ivanell, Stefan (Gotland University/KTH). 2012.

Keywords: PIV, LES, Navier-Stokes, vortex cores, wake expansion

Study of the effect of the presence of downstream turbines on upstream ones and use of a controller in CFD wind turbine simulation models.

Breton, Simon-Philippe (Gotland University), Nilsson, Karl (Gotland University/KTH), Ivanell, Stefan (Gotland University/KTH), Olivares-Espinosa, Hugo (École de technologie supérieure), Masson, Christan (École de technologie supérieure), Dufresne, Louis (École de technologie supérieure). 2012.

Keywords: OpenFOAM, EllipSys3D, CFD, LES, blade-element method

Methods for strategic environmental assessment of wind power plants.

A KTH subproject of a StandUp-project concerning Energy systems analysis and environmental assessment. The subproject is focused on developing and applying GIS-based multi-criteria analysis methods for integrating different sustainability issues in planning. The project involves both qualitative a review of existing Swedish comprehensive plans on wind power and a quantitative review of the mapping of resources and trade-offs between energy potential and environmental impacts.

www.kth.se/abe/inst/lwr/grupper/ema/research.

The Swedish Research Program Vindval

Vindval is a research program that aims to facilitate development of wind power in Sweden. The program focuses on environmental impacts of wind power; humans and landscapes, the marine environment, birds, bats and other mammals.

The program includes more than 30 individual research projects and four works of synthesis. The results from these projects can be used as a basis for environmental impact assessments as well as in the planning and permitting processes for wind power development.

Vindval is a collaborative project between the Swedish Energy Agency (Energimyndigheten) and the Swedish Environmental Protection Agency (Naturvårdsverket) and has been funded until 1 July 2013.

In its fall budget the Swedish government proposed that Vindval be allocated an additional 10 million SEK per year for four years after 2013. The government wrote that the program should continue and noted that large-scale wind development was new in Sweden and that there were still questions that needed to be examined in terms of wind power's impact on nature, the environment and humans.

Research is conducted in four areas:

1. Marine life
2. Terrestrial mammals
3. Birds and bats
4. Humans

1. Marine Life

Synthesis report:

The effects of wind power on marine life.

The Swedish Research Program Vindforsk III

Vindforsk III is a program for basic and applied wind energy research. The program is half funded by Swedish Energy Agency (Energimyndigheten) and is half funded by energy companies and other industries related to wind energy. The program is planned to last from 2009 until 2012 and have a total budget of approximately 80 million SEK.

The program's focus is primarily technical.

The program aims to strengthen wind energy potential by:

- Producing generalizable results concerning wind power characteristics and opportunities
- Research activities will take place at the international forefront for a number of technologies
- Preserve and strengthen the skills of existing research groups at universities and technical schools
- Strengthen the recruitment base for the Swedish wind power industry
- Highlight wind power research and disseminate the results

The program is also divided into the following research areas:

- The wind resource and establishment
- Cost efficient wind farms and planning
- Optimal operation and maintenance
- Wind power in the electrical grid
- External environment monitoring and standardization

Technical Research Centers

Svenskt VindkraftsTekniskt Centrum

The center was formed to meet the needs of the rapidly expanding global wind power industry and to raise wind power expertise in Sweden. The wind power research center will focus on developing knowledge of the construction of wind turbines and of optimizing maintenance and production costs. Its goal is to be able to build both partial and complete wind power systems in Sweden. The objective of the center is also to supply the Swedish industry with in-depth expertise within the wind power field. By integrating education, research and innovation, it hopes to contribute new knowledge and a transposition of today's industries.

Keywords: Ancillary benefits, Climate policy, Swedish energy system

The missing link: Bringing institutions and politics into energy future studies.

Nilsson, Måns (Stockholm Environment Institute and KTH), Nilsson, Lars J. (Lund University), Hildingsson, Roger (Lund University), Stripple, Johannes (Lund University), Eikeland, Per Ove (Fritjof Nansens Institute). Futures, Volume 43, Issue 10, December 2011, Pages 1117-1128

<http://dx.doi.org/10.1016/j.futures.2011.07.010>.

Keywords: Backcasting, Systems, Institutions, Sweden, Climate, Governance

The emerging funding gap for the European Energy Sector—Will the financial sector deliver?

Jacobsson, Robin (IMIT), Jacobsson, Staffan (Chalmers). Environmental Innovation and Societal Transitions, November 2012.

<http://dx.doi.org/10.1016/j.eist.2012.10.002>.

Keywords: Europe, Financial sector, Funding gap, Renewable energy

Is the Swedish environmental technology sector 'green'?

Guziana, Bozena (Mälardalen University). Journal of Cleaner Production, Volume 19, Issue 8, May 2011, Pages 827-835.

<http://dx.doi.org/10.1016/j.jclepro.2010.09.007>.

Keywords: Cleantech, Environmental goods and services sector, Environmental technology sector, 'Green' business, 'Green-green' business, Product and production related environmental aspects

På väg mot en elförsörjning baserad på enbart förnybar el i Sverige: En studie om behovet av reglerkraft. Version 1.0.

Söder, Lennart (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-105278>.

Keywords: Energy Roadmap 2050, vindkraft, solkraft, vattenkraft, reglerkraft

Maintenance Solutions for Continuous & Cost-effective Improvement of Wind Turbine Performance.

Al-Najjar, Basim (Linnaeus University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-22622>.

Keywords: Most Cost-effective Maintenance, Wind Power Turbine Problems, Most Informative Condition Monitoring

The influence of background sounds on loudness and annoyance of wind turbine noise.

Kedhammar, Anders (Stockholm University), Nilsson, Mats E. (Stockholm University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:su:diva-81834>.

Keywords: Ambient sounds, Perceived loudness

A review of life cycle assessments on wind energy systems.

Davidsson, Simon (Uppsala University), Höök, Mikael (Uppsala University), Wall, Göran (Gotland University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-168922>.

Keywords: life cycle assessment, wind energy, wind power, natural resource use, primary energy conversion, energy accounting

Measurements of Sound from Wind Turbines.

Larsson, Conny (Uppsala University), Öhlund, Olof (Uppsala University). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-165285>.

Keywords: sound, noise, refraction, wind turbine

Variations of sound from wind turbines during different weather conditions.

Larsson, Conny (Uppsala University), Olof, Öhlund (Uppsala University). 2012.

ftp://www.hyd.uu.se/olof/Larsson_internoise2012.pdf.

Keywords: meteorological conditions, water bay, forest areas, heterogeneous terrain

Technical Research

The upstream flow of a wind turbine: blockage effect.

Medici, D. (Garrad Hassan Italia), Ivanell, S. (Gotland University), Dahlberg, J.-Å. (Vattenfall Vindkraft AB), Alfredsson, P. H. (KTH). 2011.

<http://onlinelibrary.wiley.com/doi/10.1002/we.451/full>.

Keywords: upstream flow, blockage effect, power curve measurements

A Limited-Scope Reliability-Centred Maintenance Analysis of Wind Turbines. Fischer, Katharina (Chalmer), Besnard, François (Chalmers), Bertling, Lina (Chalmers). 2011.
<http://publications.lib.chalmers.se/publication/138613-a-limited-scope-reliability-centred-maintenance-analysis-of-wind-turbines>.

Keywords: wind, maintenance, RCM, reliability, failure, FMEA, FMECA

Patent data as indicators of wind power technology development.

Dubarić, Ervin (Mid-Sweden University), Giannoccaro, Dimitris (ABB, AB), Bengtsson, Rune (SLU), Ackermann, Thomas (Paul Ehrlich Institute). 2011.
<http://academic.research.microsoft.com/Publication/49237275/patent-data-as-indicators-of-wind-power-technology-development>.

Keywords: wind power, patent, technology development

Double large field stereoscopic PIV in a high Reynolds number turbulent boundary layer.

Coudert, S. (Lille1 University), Foucaut, J. M. (Lille1 University), Kostas, J. (Lille1 University), Stanislas, M. (Lille1 University), Braud, P. (Université de Poitiers), Fourment, C. (University of Bordeaux 1), Delville, J. (Université de Poitiers), Tutkun, M. (Chalmers), Mehdi, F. (Chalmers), Johansson, P. (Chalmers), George, W. K. (Chalmers). 2011.
<http://academic.research.microsoft.com/Publication/26094705/double-large-field-stereoscopic-piv-in-a-high-reynolds-number-turbulent-boundary-layer>.

Keywords: turbulent boundary layer, Reynolds number, potential model

A comparison study of harmonic emission measurements in four wind parks. Kai, Yang (University of Electronic Science & Technology of China), Bollen, Math H. J. (Luleå University), Wahlberg, Mats (Luleå University). 2011.

<http://academic.research.microsoft.com/Publication/51138726/a-comparison-study-of-harmonic-emission-measurements-in-four-windparks>.

Keywords: harmonic current, grid, voltage

Impacts of large-scale solar and wind power production on the balance of the Swedish power system.

Widén, Joakim (Uppsala University), Åberg, Magnus (Uppsala University), Henning, Dag (Optensys Energianalys AB). 2011.

http://www.ep.liu.se/ecp/057/vol3/014/ecp57vol3_014.pdf.

Keywords: Solar power, Wind power, Power system, Optimization

M2C-Based MTDC System for Handling of Power Fluctuations From Offshore Wind Farms.

Ahmed, Noman (KTH), Haider, Arif (KTH), Ångquist, Lennart (KTH), Nee, Hans-Peter (KTH). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-43237>.

Keywords: Modular multilevel converter, Multi-terminal HVDC transmission, Power fluctuations, Wind power plants, Converter control

A wind tunnel method for screening the interaction between wind turbines in planned wind farms.

Sandberg, Mats (University of Gävle), Wigö, Hans (University of Gävle), Claesson, Leif (University of Gävle), Cehlin, Mathias (University of Gävle). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hig:diva-10136>.

Keywords: wind farms, pressure, distribution on ground, wind tunnel

Design of a unique direct driven PM generator adapted for a telecom tower wind turbine.

Eriksson, S. (Uppsala University), Bernhoff, H. (Uppsala University), Bergkvist, M. (Uppsala University). Renewable Energy, Volume 44, August 2012, Pages 453-456.

<http://dx.doi.org/10.1016/j.renene.2012.01.090>.

Keywords: Vertical axis, Wind turbine, Telecommunication, Permanent magnet, Generator

No-load core loss prediction of PM generator at low electrical frequency.

Bülow, Fredrik (Uppsala University), Eriksson, Sandra (Uppsala University), Bernhoff, Hans (Uppsala University). *Renewable Energy*, Volume 43, July 2012, Pages 389-392.

<http://dx.doi.org/10.1016/j.renene.2011.12.002>.

Keywords: Core loss, Variable speed, PM generator, Cable wound generator, Loss separation

Power coefficient measurement on a 12 kW straight bladed vertical axis wind turbine.

Kjellin, J. (Uppsala University), Bülow, F. (Uppsala University), Eriksson, S. (Uppsala University), Deglaire, P. (Uppsala University), Leijon, M. (Uppsala University), Bernhoff, H. (Uppsala University). *Renewable Energy*, Volume 36, Issue 11, November 2011, Pages 3050-3053.

<http://dx.doi.org/10.1016/j.renene.2011.03.031>.

Keywords: VAWT, H-rotor, Experimental, Measured, Cp

Simulations of a vertical axis turbine in a channel.

Goude, A. (Uppsala University), Ågren, O. (Uppsala University). Submitted to *Renewable Energy*, October 2012.

<http://uu.diva-portal.org/smash/record.jsf?pid=diva2:563994>.

Keywords: Vertical axis turbine, Vortex method, Channel flow, Simulation, Current power

Influence of incoming flow direction on spacing between vertical axis marine current turbines placed in a row.

Dyachuk, E. (Uppsala University), Goude, A. (Uppsala University), Lalander, E. (Uppsala University), Bernhoff, H. (Uppsala University). In "Proceedings of the 31th International Conference on Offshore Mechanics and Arctic Engineering, OMAE 2012", Rio de Janeiro, Brazil, July 2012.

Robust VAWT control system evaluation by coupled aerodynamic and electrical simulation.

Goude, A. (Uppsala University), Bülow, F. (Uppsala University). Submitted to *Renewable Energy*, September 2012.

<http://uu.diva-portal.org/smash/record.jsf?pid=diva2:563995>.

Keywords: Wind power, VAWT, Darrieus Turbine, Control system, Numerical simulation, Vortex method

Aerodynamic and electric evaluation of a VAWT farm control system with passive rectifiers and mutual DC-bus.

Goude, A. (Uppsala University), Bülow, F. (Uppsala University). Submitted to *Renewable Energy*, November 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-183739>.

Keywords: Wind power, Wind farm, VAWT, Vortex model, Control system

Parking Strategies for Vertical Axis Wind Turbines.

Ottermo, Fredric (Uppsala University), Eriksson, Sandra (Uppsala University), Bernhoff, Hans (Uppsala University). *ISRN Renewable Energy*, vol. 2012, Article ID 904269, 5 pages, 2012.

[doi:10.5402/2012/904269](https://doi.org/10.5402/2012/904269).

Keywords: VAWT, storm load, direct drive, permanent magnet, torsional oscillations

Resonances and Aerodynamic Damping of a Vertical Axis Wind Turbine.

Ottermo, Fredric (Uppsala University), Bernhoff, Hans (Uppsala University). *Wind Engineering* volume 36, no. 3, 2012 pages 297-304.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-179842>.

Keywords: VAWT, oscillations, three-bladed turbine

A 225 kW Direct Driven PM Generator Adapted to a Vertical Axis Wind Turbine. Eriksson, Sandra (Uppsala University), Bernhoff, Hans (Uppsala University), Leijon, Mats (Uppsala University). *Advances in Power Electronics*, vol. 2011, Article ID 239061, 7 pages, 2011.

[doi:10.1155/2011/239061](https://doi.org/10.1155/2011/239061).

Keywords: Direct drive, permanent magnet, variable speed, VAWT

Teknik för småskalig elproduktion.

Lorenz, Klaus (Dalarna University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:du-6452>.

Keywords: mikroskala, biobränsle, vindkraftverk

Loss Evaluation and Design Optimisation for Direct Driven Permanent Magnet Synchronous Generators for Wind Power.

Bernhoff, Jon Kjellin (Uppsala University), Bernhoff, Hans (Uppsala University). Applied Energy 88 (2011), pp. 265-271.

<http://dx.doi.org/10.1016/j.apenergy.2010.06.010>.

Keywords: Electromagnetic losses, Simulation, Synchronous generators, Wind turbines

Electrical Starter System for an H-Rotor Type VAWT with PM-Generator and Auxiliary Winding.

Bernhoff, Jon Kjellin (Uppsala University), Bernhoff, Hans (Uppsala University).

Wind Engineering volume 35, no. 1, 2011, pages 85-92.

[doi:10.1260/0309-524X.35.1.85](https://doi.org/10.1260/0309-524X.35.1.85).

Keywords: VAWT, starter, modulated inverter

The effect of missing data on wind resource estimation.

Coville, Aidan (The World Bank), Siddiqui, Afzal (University College London, Stockholm University), Vogstad, Klaus-Ole (Agder Energi, Norwegian University). Volume 36, Issue 7, July 2011, Pages 4505-4517.

<http://dx.doi.org/10.1016/j.energy.2011.03.067>.

Keywords: Wind power, Missing data, Investment analysis

Symmetrical and unsymmetrical short-circuit current of squirrel-cage and doubly-fed induction generators.

Sulla, F. (Lund University), Svensson, J. (Lund University), Samuelsson, O. (Lund University). Electric Power Systems Research, Volume 81, Issue 7, July 2011, Pages 1610-1618.

<http://dx.doi.org/10.1016/j.epsr.2011.03.016>.

Keywords: Short circuit currents, Wind power generation, Doubly fed induction generators (DFIG), Protection

A low Reynolds number variant of partially-averaged Navier–Stokes model for turbulence.

Ma, J.M. (China Agricultural University/Chalmers University), Peng, S.-H. (Chalmers/ Swedish Defence Research Agency), Davidson, L. (Chalmers), Wang, F.J. (China Agricultural University). International Journal of Heat and Fluid Flow, Volume 32, Issue 3, June 2011, Pages 652-669.

<http://dx.doi.org/10.1016/j.ijheatfluidflow.2011.02.001>.

Keywords: Low Reynolds number model, Near-wall behavior, Turbulent flow

Laboratory verification of system for grid connection of a 12 kW variable speed wind turbine with a permanent magnet synchronous generator.

Apelfröjd, Senad (Uppsala University), Bülow, Fredrik (Uppsala University), Kjellin, Jon (Uppsala University), Eriksson, Sandra (Uppsala University).

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-182434>.

Keywords: VAWT, Tap transformer, LCL-filter, voltage source inverter

Wind power stabilising control: Demonstration on the Nordic grid.

Elkington, Katherine (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-92302>.

Keywords: Keywords: Doubly fed induction generator, DFIG, Stability, Power system

Using Energy Payback Time to Optimise Onshore and Offshore Wind Turbine Foundations.

Horgan, Chris (University College Cork), Ni Nuallain, Nora Aine (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-104008>.

Keywords:

Induction Machine at Unity Power Factor with Rotating Power Electronic Converter.

Malik, Naveed ur Rehman (KTH), Sadarangani, Chandur (KTH), Cosic, Alija (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-102208>.

Keywords: constant speed operation, induction machine self-excitation, reactive power, rotating power electronic converter, rotor connected power electronic converter, solid state switches, stator, unity power factor, variable torque

Automated Design of an FDI-System for the Wind Turbine Benchmark.

Svärd, Carl (Linköping University), Nyberg, Mattias (Linköping University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:liu:diva-77188>.

Keywords: Generators, diagnostic, faults

An EEMD and ICA-based Integrative Approach to Wind Turbine Gearbox Diagnosis.

Wang, Jinjiang (University of Connecticut), Gao, Robert X. (University of Connecticut), Yan, Ruqiang (Southeast University), Wang, Lihui (University of Skövde). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:his:diva-6856>.

Keywords: Wind turbine, bearing diagnosis, EEMD, ICA

Time-Series Based Cable Selection for a Medium Voltage Wind Energy Network.

Chen, Peiyuan (Chalmers), Thiringer, Torbjörn (Göteborgs University). 2012.

<http://publications.lib.chalmers.se/publication/157850-time-series-based-cable-selection-for-a-medium-voltage-wind-energy-network>.

Keywords: Cable, capacity factor, sizing, time series, wind energy

Model-based control of wind turbines: look-ahead approach.

Stotsky, Alexander (Chalmers), Egardt, Bo (Chalmers). 2012.

<http://pii.sagepub.com/content/226/8/1029.short>.

Keywords: Wind turbine, preview control, look-ahead modeling, feedforward, spline interpolation, load mitigation, wind turbine model reduction

Academic Theses 2011-2012

Doctoral Theses

Anteciperande förvaltning: tjänstemäns makt i kommunala policyprocesser om vindkraft.
Bengtsson, Mats (Göteborgs Universitet). 2012.

<http://hdl.handle.net/2077/28983>.

Keywords: Power, influence, discretion, administrator, politician, anticipation, power to, power over, public administration, local government, policy, policy process, case study, democracy, bureaucracy, wind power, Falkenberg, Halmstad, Sweden

Offshore wind farms - ecological effects of noise and habitat alteration on fish.

Andersson, Mathias H. (Stockholm University). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:su:diva-54049>.

Keywords: renewable energy, fish population, artificial reef, attraction vs. production, habitat structure, reef effect, FAD, bioacoustics, noise disturbance, fish behavior, detection range, threshold, masking, fish communication and hearing

The Dynamic Impact of Large Wind Farms on Power System Stability.

Elkington, Katherine (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-93220>.

Keywords: Doubly fed induction generator; DFIG; Stability; Power system; One-axis model; Third order model; Eigenvalues

Analysis of High-Frequency Electrical Transients in Offshore Wind Parks.

Abdulahovi, Tarik (Chalmers University). 2011.

http://www.elforsk.se/Global/Vindforsk/Rapporter%20VFIII/TarikAbdulahovic_thesis_December2011.pdf.

Keywords: very fast transient, breaker, surge, surge protection, transient overvoltage, prestrikes, restrikes, voltage escalation

Vertical Axis Wind Turbines: Electrical System and Experimental Results.

Kjellin, Jon (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-182438>.

Keywords: VAWT, H-rotor, start-up, all-electric control, Power Coefficient, stall, tip speed ratio, Renewable energy, Measurement systems, PM-generator

Fluid Mechanics of Vertical Axis Turbines: Simulations and Model Development. Goude, Anders (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-183794>.

Keywords: Wind power, Marine current power, Vertical axis turbine, Wind farm, Channel flow, Simulations, Vortex model, Streamtube model, Control system, Graphics processing unit, CUDA, Fast multipole method

Licentiate Theses

Vindkraft i Dalarna: Från acceptans och lokalisering till planering och eftertanke.

Gradén, Mattias (Uppsala Universitet). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-156568>.

Keywords: Geografi, Kulturgeografi, Social acceptans, Lokal planering, Översiktsplaner, Vindkraft, Vindkraftsetablering, Falun, Mora, Orsa kommuner, Dalarna

Extreme Load Conditions for Wind Powered Direct Drive PM Generators.

Bülow, Fredrik (Uppsala University). 2011.

http://www.el.angstrom.uu.se/Seminar/fredrik_lic_2011.pdf.

Keywords: Vertical axis turbine, stator core, turbine torque

Wind-Turbine Harmonic Emissions and Propagation through a Wind Farm.

Yang, Kai (Luleå University). 2012.

http://pure.ltu.se/portal/files/36705627/Kai_Yang.pdf.

Keywords: Renewable energy, electric power system, wind power, power quality, power system harmonics

Fluid mechanical simulations and development for vertical axis turbines.

Goude, Anders (Uppsala University). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-164349>.

Keywords: Wind power, Vertical axis turbine, Wind farm, Channel flow, Simulations, Vortex model, Streamtube model

On Frequency Control Schemes in Power Systems with Large Amounts of Wind Power.

Hamon, Camille (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-105419>.

Keywords: Wind power, Stochastic optimal power flows, Frequency control schemes, Tertiary frequency control, uncertainty, power systems

Analysis and Control Aspects of Brushless Induction Machines with Rotating Power Electronic Converters.

Malik, Naveed ur Rehman (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-102210>.

Keywords: Doubly-fed induction generator, extended vector control, induction machine, internal model control, Lindmark concept, low voltage ride through, passive resistive network, rotating power electronic converter, rotating exciter, symmetrical faults, synchronous machine, unity power factor, unsymmetrical faults, vector control, wind turbines.

Wakes behind wind turbines - Studies on tip vortex evolution and stability.

Odemark, Ylva (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-93806>.

Keywords: wind power, aerodynamics, hot-wire anemometry, vortex dynamics

On Distributed Balancing of Wind Power Forecast Deviations in Competitive Power Systems.

Scharff, Richard (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-103608>.

Keywords: balancing, wind power integration, electricity market, wind power variations, wind power forecast errors

Masters Level Theses 2011-2012

The potential for sustainable energy systems in cities. A comparison between Delft, Grenoble and Växjö.

Turesson, Jonas (KTH). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-34442>.

Keywords: RES, Renewable Energy Sources, Wind, Solar PV, Waste Treatment, Växjö, Delft, Grenoble, Sustainable Cities, Energy

Projektering av urban vindkraft.

Olsson, Magnus (Umeå Universitet). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:umu:diva-58992>.

Keywords: Umeå Energi, urban vindkraft, Strömpilenområdet, ekonomisk, investeringar

Spelet om vindkraftverken: En komparativ analys av översiktsplanering för vindkraft i två kommuner vid Vänern.

Andersson, Mattias (Örebro University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:oru:diva-24550>.

Keywords: energi, vindkraft, samhällsplanering, kommuner, Karlstad, Säffle, Vänern, makt, demokrati

Första steget mot ett egenutvecklat litet vindkraftverk: Framtagning av ett vindkraftsblad.

Skyllermark, Emelie (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-100815>.

Keywords: Skyllermarks, Southwest Windpower, injection moulding, vortex generators

Study of Grid Code Compliance: Thanet Wind Farm.

Sjölund, Malin (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-180256>.

Keywords: Vattenfall, Thanet, transmission grid compliance, connection, ENTSO-E

Scenarioanalys över Sveriges elproduktion år 2050: Kan Sverige försörja sig med 100 % förnybar elproduktion?

Adolfsson, Ida (Uppsala Universitet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-181039>.

Keywords: Effektbrist, Energibrist, LEAP, Kausala samband, Normalår, Systemstruktur, Teknisk potential, VSV, Utnyttjandegrad

Projektet att etablera vindkraft: möjligheter och risker med ett förnybart energisystem.

Olsson, Jakob (Uppsala Universitet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-177364>.

Keywords: establishing wind farms, project management, project theory, finalization, savings

Förutsättningar för småskalig vindkraft: En europeisk översikt med inblick i Danmark och Polen.

Thorsson, Pontus (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-96765>.

Keywords: småskalig, vindkraft, Danmark, Polen, Europa

Mätning av ljudimmission från vindkraft. Vidareutveckling av metod för mätning.

Fredriksson, Jens (KTH). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-91426>.

Keywords: 2020, Elforsk, Naturvårdsverket, IEC 61400-11, ljudimmissionsmatning

Vindkraftens påverkan på svensk elproduktion: Förändringar av vatten-, kärn- och värmekraftsproduktion vid ökad andel vindkraft.

Häggeström, Anton (Karlstad Universitet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kau:diva-13692>.

Keywords: vindkraft, balans, reglering, vattenkraft, värmekraft, kärnkraft, fjärrvärme, balansering, vindkraftsutbyggnad, simulering, modell, nederbörd

Förstudie för etablering av vindkraft vid Dåva kraftvärmeverk.

Bonthron, Jonatan (Umeå Universitet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:umu:diva-59074>.

Keywords:

Hur hanteras risken för fåglar och fladdermöss i tillståndsprovningen av vindkraft?

Samuelsson, Emil (Göteborgs Universitet). 2011.

<http://hdl.handle.net/2077/25526>.

Keywords: Miljö rätt

Konflikterande intressen, rationaliteter och organisatoriska logiker vid storskalig vindkraftsanläggning -En hermeneutisk studie om möjligheter och risker kring nuvarande förutsättningar.

Eriksson, Pär Axel (Göteborgs Universitet). 2012.

<http://hdl.handle.net/2077/29732>.

Keywords: Samhällsplanering, Rationalitet, Logik, Vindkraft, Storskalig, vindkraftsanläggning

The Overhead Line Sag Dependence on Weather Parameters and Line Current. Lindberg, Elisabeth (Uppsala University). 2012.

http://www.w-program.nu/filer/exjobb/Elisabeth_Lindberg.pdf.

Keywords: Overhead lines, dynamic rating, real-time monitoring, conductor temperature model, sag limit

Life Cycle Exergy Analysis of Wind Energy Systems: Assessing and improving life cycle analysis methodology.

Davidsson, Simon (Uppsala University). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-157185>.

Keywords: exergy, LCA, life cycle assessment, life cycle analysis, wind energy, wind power

Gårdsverk i Skåne.

Jonsson, Daniel (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-70150>.

Keywords: gårdsverk, vindkraftverk, småskalig vindkraft, vindbruk

Analys av skillnader och likheter i EU-länders långsiktiga klimatstrategier.

Hansson, Caroline (SLU). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-177073>.

Keywords: färdplan 2050, växthusgaser, tvågradersmålet, klimatpåverkan

Analys av vinddata från lidar.

Edvinsson, Lisette (Uppsala Universitet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-172353>.

Keywords: lidar, vindanalys, jämförelse, vindhastighet, turbulensintensitet

Design of Stand Alone Renewable Power Supply Systems on Futuna Island, Vanuatu.

Berning, Katrine (Uppsala University). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-157183>.

Keywords: Renewable, energy, stand-alone, wind power, solar power, Vanuatu

Utvärdering av statistiska analysmetoder för detektion av partiell nedisning av anemometrar.

Helmersson, Irene (Uppsala Universitet). 2011.
<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-145962>.
 Keywords: Anemometer, vindmätning, nedisning

Lågfrekvent buller hos Vindkraftverk och Trafik.

Tari, Wetterblad (KTH), Alborz, Viktor (KTH). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-101942>.
 Keywords: lågfrekvent, ljud, binauralinspelningarna, irritationsnivån

Balansering av en storskalig vindkraftsutbyggnad i Sverige med hjälp av den svenska vattenkraften.

Obel, Fredrik (KTH). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-98672>.
 Keywords: vattenkraft, vindkraftens, ojämna produktion, balansera, elnäten

Håller vindkraften vad den lovar?

Viotti, Olle (Uppsala Universitet). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-175394>.
 Keywords: vindkraft, förnyelsebar energi, statistik

Aggregate Model of Large Wind Parks for Power System Studies.

Sada Fernando, Javier (KTH). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-53747>.
 Keywords: distribution network, induction generators, synchronous generators, PowerFactory, park aggregation, wake

Turbulence Intensity in Complex Environments and its Influence on Small Wind Turbines.

Carpman, Nicole (Uppsala University). 2011.
<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-153215>.
 Keywords: turbulence intensity, complex, uniform, small wind turbines, IEC standard classes, normal turbulence model.

Fatigue Assessment of Concrete Foundations for Wind Power Plants.

Göransson, Frida (Chalmers), Nordenmark, Anna (Chalmers). 2011.
<http://publications.lib.chalmers.se/records/fulltext/148138.pdf>.
 Keywords: Fatigue, fatigue assessment method, wind power plant, concrete foundation slab, Eurocode 2, fib Model Code 2010

Voltage Stability at Hydropower Stations Influenced by close-located Wind Farms.

Lidström, Erica (Uppsala University). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-181017>.
 Keywords: Voltage Stability, Hydropower, Wind farm, PSS/E, Load-flow calculations, Reactive Power

Nyckelfaktorer för mikroproduktionsmarknaden av elektricitet i Sverige.

Nilsson, Tobias (KTH), Bartha, Thomas (KTH). 2011.
<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-101751>.
 Keywords: Egenproducent, elektricitet, elmarknaden, lönsamhetskalkyl, mikroproduktion, nettodebitering, Norra Djurgårdsstaden, solceller, solcellstöd, typvilla, vindturbiner

Wind Power Controversies: A Case Study in Ödeshög, Sweden.

Westling, Suzette (Linköping University). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:liu:diva-81327>.
 Keywords: Actor-Network theory, environmental conflict, wind power, Ödeshög municipality

Evaluation and development of normal year correction methodologies for icing climatology in wind farm applications.

Klintström, Rebecka (Lund University). 2011.

<http://lup.lub.lu.se/luur/download?func=downloadFile&recordId=3054826&fileId=3054832>.

Keywords: ice modeling, normal year correction, icing of wind turbines, mesoscale meteorological models.

Wind Farms Influence on Stability in an area with High Concentration of Hydropower Plants.

Engström, Staffan (Uppsala University). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-158447>.

Keywords: Doubly-Fed induction generator, Full power converter, Hydropower, Simpov, Small-signal stability, Rotor angle stability, Voltage stability, Transient stability, Wind farm

Large Eddy Simulations of Wind Turbines Employing the Virtual Boundary Method.

Barup, Sten Edström (Lund University). 2011.

<http://lup.lub.lu.se/luur/download?func=downloadFile&recordId=1851754&fileId=1851759>.

Keywords: eddy simulations, CFD, wake interaction

Management System for Operations Maintenance in Offshore Wind Turbine Plant.

Ghanbari, Ahmad (Halmstad University), Oyelakin, Muhydeen (Halmstad University). 2012.

<http://hh.diva-portal.org/smash/record.jsf?pid=diva2:479007>.

Keywords: Management system, Offshore Wind Power Plant, Wind turbine Plant, Preventive Maintenance, Corrective Maintenance

The Issue of Trust in Swedish Wind Power Planning: A case study of the wind power project in Markbygden, Sweden.

Johansson, Magnus (KTH). June 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-35380>.

Keywords: Trust, Planning, Legislation, Power, Wind Power, Sweden

Design of an offshore wind farm and power fluctuations handling via thermal power plants and energy storage - A case study of Vindplas Göteborg.

Rådegård, Eric (Chalmers). June 2012.

<http://publications.lib.chalmers.se/publication/159001-design-of-an-offshore-wind-farm-and-power-fluctuations-handling-via-thermal-power-plants-and-energy>.

Keywords: energy storage, power fluctuations, Rya CHP plant, V2G, Vindplats Göteborg, wind power, wind farm layout

Directivity of sound from wind turbines: A study on the horizontal sound radiation pattern from a wind turbine.

Friman, Manne (KTH). Nov 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-48926>.

Keywords: Directivity, wind, turbine, noise

Wind Data Management and the Impact on Wind Power Farm Investments.

Corné, Jonas (Chalmers), Lindström, Andreas (Chalmers). 2011.

<http://publications.lib.chalmers.se/records/fulltext/152507.pdf>.

Keywords: financing, Net Present Value, wind data

Distributed generation - the reality of a changing energy market: A market based evaluation and technical description of small wind power and photovoltaics in Sweden.

Karlsson, Linda (Uppsala University). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-161233>.

Keywords: distributed generation, photovoltaics, small wind power, power quality

Maximizing Local Acceptance through Benefit Sharing.

Koebel, Evan (Gotland University). 2011.

http://www.hgo.se/wpmaster/2622-hgo/version/default/part/AttachmentData/data/FINAL-PresentationCopy_REV.Aug8_.pdf

Keywords: Wind power, social acceptance, local acceptance, public acceptance, benefit sharing, benefit sharing mechanisms, acceptance strategy

Wind Turbine Production losses in Cold Climate: Case study of ten wind farms in Sweden.

Malmsten, Jon (Gotland University). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hgo:diva-1089>.

Keywords: Icing of wind turbines, production losses, cold climate, reanalysis data

Diffusion of Innovation System Elements: A novel method to study technology development and its application to wind power.

Skelton, Martin (Chalmers). 2012.

<http://publications.lib.chalmers.se/records/fulltext/159843.pdf>.

Keywords: Technology diffusion, Technological Innovation Systems, Wind power

Powerful winds from the east: Explaining the fast development of the Chinese wind turbine industry.

Nilsson, Maria (Chalmers), Norén, Sandra (Chalmers). 2011.

<http://publications.lib.chalmers.se/records/fulltext/152973.pdf>.

Keywords: China, Renewable Energy Law, government support, feed-in tariffs

Var blåser vinden bäst? Statistiska undersökningar av vindförhållanden för vindkraft.

Elofsson, Fredrik (Chalmers), Marling, Hannes (Chalmers), Mustedanagic, Amir (Chalmers), Säbben, Olivia (Chalmers). 2012.

<http://publications.lib.chalmers.se/records/fulltext/158542.pdf>.

Keywords: weibullfördelningen, Whittle, Bayesian, Markov chain Monte Carlo

Wake Measurements Behind An Array Of Two Model Wind Turbines.

Bartl, Jan (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-61737>.

Keywords: Wind turbine, wake, wind farm, wake interaction, velocity deficit, turbulence

How to develop onshore wind farm projects in France under the new Grenelle 2 law.

Baudrey, Xavier (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-96706>.

Keywords: wind power, Grenelle, wind farms, wind turbines

Wind Development in Wallonia.

Ghazali, Najoua (KTH). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-35219>.

Keywords: wind energy, wind farm development, Nordex, Belgium, Wallonia, grid code, grid connection requirements

Power Quality Analysis of a 110 MW Wind Farm in a 130 kV Switchyard.

Näslund, My (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-181193>.

Keywords: Power Quality, Flicker, Inter-harmonics, Harmonics, Unbalance, Wind Power

Reliability of wind farm design tools in complex terrain: A comparative study of commercial software.

Timander, Tobias (KTH), Westerlund, Jimmy (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-103119>.

Keywords: WindPRO, WAsP, WindSim, Wind Energy, Wake, Complex Terrain, Forest, CFD, Linear Model

Fastighetsägare som bli blåsta på vinden. En analys av fastighetsägarnas motstridiga intressen att utnyttja naturresurser genom vindkraftverk och bergvärmepumpar.

Åkesson, Marie (Göteborgs Universitet). 2011.

<http://hdl.handle.net/2077/25529>.

Keywords: Konkurrensrätt

Wind Power and Its Impact on the Moldovan Electrical System.

Eriksson, Joel (Uppsala University), Gozdz Englund, Simon (Uppsala University).

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-173725>.

Keywords: pss/e, python, power system, wind power, wind energy, electrical system, contingency analysis, Moldova

Utvärdering av urban vindkraft.

Melin, Björn (Umeå Universitet). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:umu:diva-59098>.

Keywords: NCC, Solna Stad, urban vindkraft, IVL, PEST, SWOT

Hybrid Energy System for Off – Grid Rural Electrification (Case study Kenya).

Ouma, Clint Arthur (Gotland University). 2011.

[http://www.hgo.se/wpmaster/2609-](http://www.hgo.se/wpmaster/2609-hgo/version/default/part/AttachmentData/data/MS%20WIND%20POWER%20PROJECT%20MANAGEMENT%20%28Repaired%29.pdf)

[hgo/version/default/part/AttachmentData/data/MS%20WIND%20POWER%20PROJECT%20MANAGEMENT%20%28Repaired%29.pdf](http://www.hgo.se/wpmaster/2609-hgo/version/default/part/AttachmentData/data/MS%20WIND%20POWER%20PROJECT%20MANAGEMENT%20%28Repaired%29.pdf).

Keywords: Hybrid Energy System, Wind Power, Hybrid Power Optimization, Off–Grid Rural Electrification

Design of Harmonic Filters for Renewable Energy Applications.

Kumar, Bhunesh (Gotland University). 2011.

[http://www.hgo.se/wpmaster/2782-](http://www.hgo.se/wpmaster/2782-hgo/version/default/part/AttachmentData/data/thesis_report_v_Bahri.pdf)

[hgo/version/default/part/AttachmentData/data/thesis_report_v_Bahri.pdf](http://www.hgo.se/wpmaster/2782-hgo/version/default/part/AttachmentData/data/thesis_report_v_Bahri.pdf).

Keywords: Digital Filter, Impulse Response, Wave Digital Filter, Circulator-Tree WAVE Digital Filter, Harmonics Filter, Renewable energy Filter, Wind Energy Filter, Butterworth, Chebyshev and Cauer filters, Low-pass, High-pass and Band-pass filters

Balancing of Wind Power: Optimization of power systems which include wind power.

Ulker, Muhammed Akif (Gotland University). 2011.

[http://www.hgo.se/wpmaster/2911-](http://www.hgo.se/wpmaster/2911-hgo/version/default/part/AttachmentData/data/Thesis_Muhammed.pdf)

[hgo/version/default/part/AttachmentData/data/Thesis_Muhammed.pdf](http://www.hgo.se/wpmaster/2911-hgo/version/default/part/AttachmentData/data/Thesis_Muhammed.pdf).

Keywords: Wind power, power systems, electricity markets, frequency control, voltage control, operation planning

Assessment of Marine Conditions for Logistics, Operation Envelope and Weather Window for Offshore Projects.

Selvaraj, Edwin Selvaraj (Gotland University). 2011.

http://www.hgo.se/wpmaster/2695-hgo/version/default/part/AttachmentData/data/Thesis_-_2011_-_Edwin_Rajesh.pdf.

Keywords: DOF (Degrees Of Freedom), Equations of motion, MSS (Marine System Simulator), Waves, Crane

Wind Speed Prediction using Global and Regional Based Virtual Towers in CFD Simulations.

Moubarak, Roger (Gotland University). 2011.

[http://www.hgo.se/wpmaster/2783-](http://www.hgo.se/wpmaster/2783-hgo/version/default/part/AttachmentData/data/Thesis_work_4.pdf)

[hgo/version/default/part/AttachmentData/data/Thesis_work_4.pdf](http://www.hgo.se/wpmaster/2783-hgo/version/default/part/AttachmentData/data/Thesis_work_4.pdf).

Keywords: Global-Regional Global Model, Era Interim, StormGeo, WRF, ECMWF, Data Series, WindSim, Hindcast

Wind Power Potential in Palestine/Israel: An investigation study for the potential of wind power in Palestine/Israel, with emphasis on the political obstacles.

Odeh, Yousre (Gotland University). 2011.

<http://www.hgo.se/wpmaster/2615-hgo/version/default/part/AttachmentData/data/Wind Power Potential in Palestine%20%282%29.pdf>.

Keywords: Wind resource assessment, land breeze, sea breeze, wind fluctuation, wind frequency rose, diurnal wind profile, correlation matrix, West-bank, Palestine, Israel, wind profile, Israeli-Palestinian conflict, political barriers.

Wind Flow Analysis on a Complex Terrain: A reliability study of a CFD tool on forested area including effects of forest module.

Teneler, Görkem (Gotland University). 2011.

<http://www.hgo.se/wpmaster/3065-hgo/version/default/part/AttachmentData/data/Wind%20Flow%20Analysis%20on%20a%20Complex%20Terrain%20by%20G%C3%B6rkem%20Teneler.pdf>.

Keywords: Wind, Complex terrain, Forest, CFD, WindSim

Reliable Centered Maintenance (RCM) Reliable and Risk Centered Maintenance (RRCM) in Offshore Wind Farms (Case Study- Sweden).

Kharaji Manouchehrabadi, Maryam (Gotland University). 2011.

http://www.hgo.se/wpmaster/2620-hgo/version/default/part/AttachmentData/data/Final_Thesis_Maryam01.pdf.

Keywords: Offshore wind farm maintenance, Preventive maintenance, Reliable centered maintenance (RCM), Reliable and Risk Centered Maintenance (RRCM)

Proposed Methodology for Technical Due Diligence Assessment of Wind Farm Projects.

Lynch, Keith (Gotland University). 2011.

http://www.hgo.se/wpmaster/2621-hgo/version/default/part/AttachmentData/data/Keith_Lynch_-_Thesis_Report_-_Final_Presentation_Copy.pdf.

Keywords: Due diligence, Technical Due Diligence, wind farm, risk assessment

Offshore Wind Turbine Transportation & Installation Analyses: Planning Optimal Marine Operations for Offshore Wind Projects.

Uraz, Emre (Gotland University). 2011.

http://www.hgo.se/wpmaster/2652-hgo/version/default/part/AttachmentData/data/Final_Presentation_Copy_Emre_Uraz_17.06.2011_Friday.pdf.

Keywords: Offshore wind farms, transportation and installations, jack-up vessels, wind turbine installation vessels, design trends in installation vessels, assembly and pre-assembly, project durations, onboard cranes, challenges due to offshore environment, time performance, crane operations

Performance Based Contracting - A Concept for Cost-effective Operation and Maintenance of Wind Power Plants.

Dibennardo, Maurizio (Gotland University). 2011.

http://www.hgo.se/wpmaster/2721-hgo/version/default/part/AttachmentData/data/maudib01THESIS_Final_Presentation_Copy.pdf.

Keywords: wind power, service, operation, maintenance, contract management, performance based contracting, performance measuring, availability, downtime, incentives, disincentives, revenue, SLA, KPI

Turbine Mounted LIDAR: The Pulsed Lidar as a Reliable Alternative.

Braña, Isaac (Gotland University). 2011.

[http://www.hgo.se/wpmaster/3234-hgo/version/default/part/AttachmentData/data/Turbine%20Mounted%20LIDAR%20The%20pulsed%20lidar%20as%20a%20reliable%20alternative-v1%20\(08%20December%202011\).pdf](http://www.hgo.se/wpmaster/3234-hgo/version/default/part/AttachmentData/data/Turbine%20Mounted%20LIDAR%20The%20pulsed%20lidar%20as%20a%20reliable%20alternative-v1%20(08%20December%202011).pdf).

Keywords: Wind power, Doppler lidar, pulsed lidar, continuous-wave lidar, power control system, wind turbine-mounted lidar

Reduction of Environmental Impact Effect of Disposing Wind Turbine Blades.

Rahmana, Behzad (Gotland University). 2011.

<http://www.hgo.se/wpmaster/2607-hgo.html>.

Offshore Wind Park Connection to an HVDC Platform, without using an AC Collector Platform.

Ahmad, Haseeb (Gotland University). 2012.

http://www.hgo.se/wpmaster/4146-hgo/version/default/part/AttachmentData/data/Final%20ThesisFinalDraft_Haseeb_Ahmad.pdf.

Keywords: HVDC, AC collector platforms, short circuit, DlgSILENT, loss analysis

Wind Resource Assessment Comparison on a Complex Terrain Employing WindPRO and WindSim.

Simisiroglou, Nikolaos (Gotland University). 2012.

<http://www.hgo.se/wpmaster/4150-hgo/version/default/part/AttachmentData/data/Thesis%20Nikolaos%20Simisiroglou.pdf>.

Keywords: Greece, grid sensitivity, P50, P75, P90

Reduced order modeling of wind turbines in MatLab for grid integration and control studies.

Antonelli, Jacopo (Gotland University). 2012.

<http://www.hgo.se/wpmaster/4151-hgo/version/default/part/AttachmentData/data/Reduced%20order%20modeling%20of%20wind%20turbines%20in%20MatLab%20for%20grid%20integration%20and%20control%20studies%20-%20Jacopo%20Antonelli.pdf>.

Keywords: wind turbine model, reduced model, grid integration, control system, MatLab

Value-Cost Appraisal of Wind Energy Applying Portfolio Analysis.

Moran, Oliver (Gotland University). 2012.

<http://www.hgo.se/wpmaster/4152-hgo/version/default/part/AttachmentData/data/Cost%20Value%20appraisal%20of%20wind%20energy%20applying%20portfolio%20analysis.pdf>.

Keywords: Levelised Generation Cost, United Kingdom, CCGT, nuclear, Modern Portfolio Theory

Wind Resource Assessment for Development of a Wind farm in Complex Terrain & High Altitude (Case Study Pararin, Andes Mountain Region in Peru).

Stamouli, Konstantina (Gotland University). 2012.

<http://www.hgo.se/wpmaster/4153-hgo/version/default/part/AttachmentData/data/Thesis%20Konstantina.pdf>.

Keywords: CFD, WindPro

Making the Most of Wind: A Business Perspective on the Subsidy Systems in France, Germany, Spain and Sweden.

Barney, Andrew (Gotland University). 2012.

http://www.hgo.se/wpmaster/4155-hgo/version/default/part/AttachmentData/data/Andrew_Barney_Thesis.pdf.

Keywords: 20-20-20 E.U. goals, feed-in tariffs, premiums, certificate quota, subsidy

Transportation Excellence for Wind Turbine Nacelle.

Babu Thennarasu, Ganesh (KTH), Kumar Annamalai Muralidharan, Hemanth (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-103012>.

Keywords: Wind turbine, nacelle, transportation, humidity, shock

The Effect of Mass and Web Spacing on the Loads and Structural Response of Increasing Wind Turbine Blade Size.

Bennett, Jeffrey (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-103434>.

Keywords: Wind Turbines, Finite Element Analysis, Aeroelastic Simulations

Winds of Change: Business model innovation in the African wind energy market.

Campbell, Derek (Halmstad University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-18012>.

Keywords: wind energy, business model, innovation, emerging markets

Study and implementation of mesoscale weather forecasting models in the wind industry.

Jourdier, Bénédicte (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-91322>.

Keywords: Mesoscale, weather, wind, energy, WRF

Viability of the electricity production comparing photovoltaic and wind power in three markets.

Lajas, Sandra (University of Gävle). 2012

<http://urn.kb.se/resolve?urn=urn:nbn:se:hig:diva-13172>.

Keywords: photovoltaic, wind power, electricity, renewable

Business Models for an Aggregator: Is an Aggregator economically sustainable on Gotland?

Lambert, Quentin (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-98482>.

Keywords: aggregator, smart grid, distribution network, demand-side management, demand response, electric heating, wind power integration, load shifting, electricity market, Gotland

Power Quality for Distributed Wind Power Generation.

Navarrete Pablo-Romero, Javier (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-105221>.

Keywords: Power quality, wind power, distributed generation

Can the province of Québec (Canada) learn from Sweden in the field of wind power energy?

Rouillard, Justin (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-184692>.

Keywords: sustainable development, wind power, Québec, Sweden, energy systems

Local communities at stake: A qualitative case study of managers' role in affecting community acceptance for wind power.

Saadat, Mikael (Uppsala University), Wahlgren, Samuel (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-175919>.

Keywords: social acceptance, community acceptance, stakeholder theory, stakeholder prioritization, wind power, India

Optimization of Grid Connected Solar-Wind Hybrid Systems for Electricity in Coastal Belt of Pakistan.

Siyal, Shahid Hussain (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-98833>.

Keywords:

An evaluation of a new Pricing technique to integrate Wind energy using two Time scales scheduling.

Tuffaha, Muzahid (Linnaeus University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-17370>.

Keywords: Pricing, scheduling, smart grids, dynamic response, stochastic processes

Performance of Long Term Wind Estimation Method at Wind Power Development.

Svensson, Emil (Chalmers). 2012.

<http://webfiles.portal.chalmers.se/et/MSc/SvenssonEmil.pdf>.

Keywords: Wind Index Linear Regression, Weibull

Bachelors Level Theses 2011-2012

Västanvind -En frisk eller en lätt bris En studie om attityd, kunskap och beteende i förhållande till vindkraft.

Lennartsson, Carolin (Göteborgs Universitet), Rosell, Linnea (Göteborgs Universitet). 2012.
<http://hdl.handle.net/2077/28709>.

Keywords: Attityder, beteende, förnyelsebar energi, information, kunskap, miljöattityder, vindkraft, Västanvind

Bygglövsbefriad vindkraft till småhuset: -Ur ett tekniskt och ekonomiskt perspektiv.

Karlowskis, Victor (KTH), Andersson, Jimmie (KTH). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-102408>.

Keywords: Vindkraft, Simulering, Huskonstruktion, Installationer

Vinddataanalys för vindkraft Storfall: behandling och analys av mätdata från sodarmätning samt produktionsberäkning.

Lundin, Mattias (Umeå Universitet), Voutilainen, Karl-Oskar (Umeå Universitet). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:umu:diva-59096>.

Keywords: Västerbotten, Nordmaling, sodar, WindPRO

Wind Power in China - A Study of the Chinese Distributed Market through the Example of Guangdong Province.

Hellberg, Unn (KTH), Snickare, Stella (KTH). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-98973>.

Keywords: China, small-scale, grid, Guangdong

Livscykelkostnader för vindkraft: En jämförelse av fallstudier.

Sjölander, Martin (Linnéuniversitetet), Svensson, Anders (Linnéuniversitetet). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-19595>.

Keywords: Livscykelkostnad, Livscykelkostnadsmodell, Vindkraftverk, Vindkraftsanläggning, Investeringskostnad, Drift och underhåll

Vindkraft och kraftledningars påverkan på djurlivet: - en litteraturstudie.

Svensson, Hanna (Högskolan i Halmstad), Uhlán, Nathalie (Högskolan i Halmstad). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-18964>.

Keywords: ljud, elektromagnetisk, renarna, stress

Mikroproduktion –Sol eller Vindkraft.

Laursen, Viktor (Linnéuniversitetet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-21969>.

Keywords: Vindkraft, Solenergi, Mikroproduktion

Vindkraft och rennärning: en fallstudie av tillståndsprocessen för Uljabuouda vindkraftsanläggning.

Walkeapää, Anne (Umeå Universitet). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:umu:diva-60671>.

Keywords: vindkraft, renar, renskötsel, tillståndsansökan, Uljabuouda

Hur framställer miljökonsekvensbeskrivningarna vindkraftens effekter på miljön?: Ett arbete om vindkraft och dess påverkan.

Dahlborg, Anna (Högskolan i Halmstad), Engberg, Johanna (Högskolan i Halmstad). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-18163>.

Keywords: miljö, vindkraft, miljökonsekvensbeskrivning, mkb, miljöeffekter, effekter

Kommunikation inom ett vindkraftsprojekt: Hur säkerställs att information om skydd av biologiska värden överförs från tillstånd till byggfas?

Johansson, Mathilda (Linnéuniversitetet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-18369>.

Keywords: vindkraft, kommunikation, naturvärden

Vindkraftens framtida scenarier.

Arvidsson, Ida (Halmstad Universitet), Ringvall, Angelica (Halmstad Universitet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-17809>.

Keywords: vindkraftverk, export, försäljning, återvinning, halvera, elcertifikat

Det blåser kring vindkraft!: En kontroversstudie om vindkraftsetablering på Västkusten.

Stensson, Hanna (Högskolan Väst), Hammarstrand, Jesper (Högskolan Väst). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hv:diva-4433>.

Keywords: Vindkraft, Etablering, Naturvärden, Västkusten, Konflikt

Anslutning av vindkraft till ett svagt nät i Tidaholm.

Forsmark, Anders (Högskolan Väst), Sidemark, Tim (Högskolan Väst). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hv:diva-4148>.

Keywords: vindkraft, smarta elnät, STATCOM, reaktiv effekt, energilagring

Finansiering av vindkraft: fallstudie av Lau Vind AB.

Lewander, Christian (Högskolan på Gotland), Westberger, Jon (Högskolan på Gotland). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hgo:diva-1468>.

Keywords: Vindkraft, Finansiering, Lokalt ägande, Markägare, Projektör, Gotland

Interna elnät inom vindkraftsparker.

Tjellander, Max (Högskolan i Halmstad). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-15881>.

Keywords: elnätbolag, koncessionsrätt, interna nät

Småskalig vindkraft: En undersökning om attityder och köpmotiv på den svenska marknaden.

Granqvist, Per (Göteborgs Universitet), Schultz, Tomas (Göteborgs Universitet). 2011.

<http://hdl.handle.net/2077/25716>.

Keywords: attityder, småskalig vindkraft

Vindkraft och landskap.

Kasic, Irhan (Högskolan på Gotland). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hgo:diva-1054>.

Keywords: satsar, Falkenberg, Varberg, skuggor, buller

Förnybar energi för ett minskat logistikberoende.

Olsson, Pontus (Försvvarshögskolan). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:fhs:diva-1185>.

Keywords: Vindkraft, solkraft, elektricitet, militärteknik

Modellering av forwardkurvan på den nordiska elmarknaden.

Medin, Christian (Uppsala Universitet). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-162004>.

Keywords: Forwardkurva, NordPoolSpot, Nordiska elmarknaden

Vindkraftens generationsskifte i Halland.

Johansson, Emil (Högskolan i Halmstad), Tegnhammar, Johan (Högskolan i Halmstad). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-17961>.

Keywords: Vindkraft, Generationsskifte, Halland, Energi

Mätning av störningar på lågspänningsnät.

Falkenström, Jack (Linnéuniversitetet), Johansson, Patrik (Linnéuniversitetet). 2012.
<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-18261>.

Keywords: Störningar på elnät, elkvalitet, elkraft, EMC

Vindkraftverk på gårdsnivå.

Källner, Filip (SLU). 2012.

<http://stud.epsilon.slu.se/4627/>.

Keywords: gårdsverk, vindkraft, nettodebitering

Konceptkonstruktion av offshore vindkraftverk.

Dahlqvist, Marcus (Chalmers), Lundström, Daniel (Chalmers). 2011.

<http://publications.lib.chalmers.se/records/fulltext/142564.pdf>.

Keywords: Ehrnbergs Solutions, Pro/Mechanica, Delarna, havet

Förundersökning: Uppförande av vindkraftverk på Åsberget, Hudiksvalls kommun.

Andersson, Cristian (Umeå Universitet). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:umu:diva-59081>.

Keywords: Åsberget, kommun, projektering

Energieffektivt bostadsområde: Förstudie till aktivhusområde i Halmstad.

Andmarsjö, Andreas (Högskolan i Halmstad), Porsblad, Oscar (Högskolan i Halmstad). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-16107>.

Keywords: Active house, Energy efficient buildings, solar cell, solar panels, Co-gen, Smart grid, Passive house, renewable energy, green energy, wind power

Vägar och markanspråk inom vindkraftsparker i Västerbottens län: Hur verkliga mått förhåller sig till vad som uppges i miljökonsekvensbeskrivningar.

Rönnqvist, Marie (Umeå Universitet). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:umu:diva-50573>.

Keywords: vindkraft, vindkraftsparker, MKB, vägar, markanspråk

Feasibility Study of Renewable Energy in Singapore.

King, Sebastian (KTH), Wettergren, Per (KTH). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-41558>.

Keywords: förnybar energi, solceller, vindkraft, Singapore, luftkonditioneringsystem

Beredning för nybyggnation av två stycken vindkraftverk i Lyrestad, Mariestad.

Gustafsson, Jonas (Högskolan Väst). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hv:diva-3434>.

Keywords: Beredning

Metoder att förhindra nedisning av vindkraftverksblad.

Olsson, Tina (Linnéuniversitetet). 2011.

<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-13701>.

Keywords: nedisning, Oxel, superhydrofoba, Lotus

Ekonomiska innovationer i den gotländska vindkraftsindustrin.

Carlzon, Jonathan (Högskolan på Gotland), Lundborg, Rebecca (Högskolan på Gotland).

<http://urn.kb.se/resolve?urn=urn:nbn:se:hgo:diva-1032>.

Keywords: Innovationer, vindkraft, ägandeform, privata aktörer, Gotland

The Role of Municipal Energy Companies in Sustainable Local Energy Systems.

Bauer, Fredric (Chalmers). 2012.

<http://publications.lib.chalmers.se/publication/159692-the-role-of-municipal-energy-companies-in>.

Keywords: municipal energy planning, municipal energy companies, environmental

Förnybar EI – Den nya tekniken: En nätverksstudie av Telge Energi.

Rashed, Awder (Uppsala Universitet), Abdallah, Ali (Uppsala Universitet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-180318>.

Keywords: elmarknaden, Telge Energi, nätverk

Vindkraftens påverkan på lokalsamhället: en fallstudie.

Wiking, Carl (SLU). 2011.

<http://stud.epsilon.slu.se/3004/>.

Keywords: vindkraft, lokalsamhälle, community, påverkan, fallstudie

Utveckling av regler för bedömning av Energisparutmaningen.

Karlsson, Ida (Linnéuniversitetet), Kelemit, Malin (Linnéuniversitetet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-19428>.

Keywords: Energideklaration, koldioxidutsläpp, energiförbrukning, tävling, intervju, kvalitativ dataanalys, miljömål

Elektrisk integrering och projektering av förnybar energi i svagt lokalt elnät.

Sporrong, Kristofer (Högskolan i Halmstad), Harrysson, Mattias (Högskolan i Halmstad). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-19037>.

Keywords: Vindkraft, Elkraft, Elektroteknik, Förnybar energi, Elektrisk integrering, Högspänning, Elnät, Vindkraftsteknik, Energiteknik, Energilagring, DynaPeaQ

Investigation of Different Airfoils on Outer Sections of Large Rotor Blades.

Thuné, Sebastian (Mälardalens högskola), Soland, Torstein (Mälardalens högskola). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:mdh:diva-15293>.

Keywords: wind, turbine, Rotor, Blade, HAWT

Projekt Vindkraftverk 12:15: En innovation inom vindkraftverk för hemmabruk.

Petersson, Andreas (Högskolan i Halmstad). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:hh:diva-19029>.

Keywords: Innovation, innovation för vindkraft, vindkraftverk, vindkraft, innovation för vindkraftverk, alternativ energi, tillverka egen energi, Vindkraftverk 12:15, En innovation för vindkraftverk för hemmabruk

Vindkraftverk – Hur vindkraftsprojektering påverkar bostadsmarknaden.

Larses, Elin (Högskolan i Borås), Hermansson, Ida (Högskolan i Borås). 2012.

<http://hdl.handle.net/2320/11191>.

Keywords: Vindkraftsetablering, Bostadsmarknad, Fastighetsmäklare, Kommuner, SWOT-analys

Livscykelkostnader för vindkraft: En jämförelse av fallstudier.

Sjölander, Martin (Linnéuniversitetet), Svensson, Anders (Linnéuniversitetet). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:lnu:diva-19595>.

Keywords: Livscykelkostnad, Livscykelkostnadsmodell, Vindkraftverk, Vindkraftsanläggning, Investeringskostnad, Drift och underhåll

Vindkraft – en alternativ drivkälla för tågtrafiken.

Andersson, Johan (Chalmers), Samo, Robert (Chalmers). 2011.

<http://publications.lib.chalmers.se/records/fulltext/142823.pdf>.

Keywords: kontaktledning, hjälpkraftledning, kraftelektronik, diodomriktare, transformator, effektbrytare, vindkraft

LQG-control of a Vertical Axis Wind Turbine with Focus on Torsional Vibrations.

Alverbäck, Adam (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-169330>.

Keywords: LQG-control, Vertical axis wind turbine, torsional oscillations

CFD Simulations of the New University of Sydney Boundary Layer Wind Tunnel.

Bertholds, Alexander (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-166945>.

Keywords: Computational fluid dynamics, CFD, fluid mechanics, wind tunnel, settling chamber, guide vanes, mesh, closed-circuit wind tunnel

Design of PM generator for a vertical axis wind turbine.

Norström Parliden, Jonas (Uppsala University), Rynkiewicz, Mateusz (Uppsala University). 2012.

<http://urn.kb.se/resolve?urn=urn:nbn:se:uu:diva-180910>.

Keywords: wind turbine, generator, permanent magnet
